

## Vergelijk werking van de actieve stoffen

MIC waarden van CIT/MIT tov OX

*MIC = Minimum Inhibitor Concentratie.*

| Organisme                      | Acticide CMG  | Grotamar    |
|--------------------------------|---------------|-------------|
|                                | o.b.v CIT-MIT | Oxazolidine |
| <i>E. coli</i>                 | 9             | 144         |
| <i>Ps. aerug.</i>              | 9             | 60 / 144    |
| <i>Ps. putida</i>              | 9             | 600         |
| <i>Ps. stutzeri</i>            | 9             | -           |
| <i>A. niger</i>                | 9             | 300         |
| <i>Peni. funi.</i>             | 11,5          | 72          |
| <i>Cand. albic bzw. valida</i> | 9             | 600-1000    |
| <i>Sacchar cere</i>            | 9             | 600         |
